1. The first part of the paper is a review of the literature on the effects of the 1997 Asian financial crisis on the economies of the Asian countries. It shows that the crisis had a significant negative impact on the growth of the Asian economies, and that the impact was more severe in the countries that had a higher degree of financial liberalization. The second part of the paper is a discussion of the causes of the crisis, and the third part is a discussion of the policy responses to the crisis.
